MESSAGE FROM DIRECTOR

WELCOME TO HIMALAYA REFRIGERATION INDUSTRIES, LEADING COOLING PRODUCTS MANUFACTURER.

It gives us immense pleasure to give an insight about our company.

Since its establishment it upholds philosophy of excellent service, professionalism and passion to serve customers which escorts increasingly and steadily progress in global market of Refrigeration Industry. The Company achieved an export turnover by way of supplies in our interested products to various countries.

Himalaya is one of the most stupendous manufacturer, supplier and exporter of many commercial & industrial refrigeration products. The company has sound backing of state of the art infrastructure at its manufacturing unit. The unit is well equipped with sophisticated machines and testing equipment specially meant for the effective production and testing of our products.

As a witting corporation dignified to flourish the life with ample usage of technology, Himalaya truly strains for grim improvement of its products and services offered to clients. We also give our wholehearted attempts to create Himalaya a real client-centrally system.

We attribute our success to continued investment of our valued customers and partners, who stood by us over the years and who has put in their trust in us. On the other hand, our internal driving force of dedicated & specialized team members, who are working above and beyond the call of duty to drive Himalaya to next level, are certainly on an equal plane.

Mr. Abhesinh.R.Dodiya
Director/Founder

ESTABLISHED IN 1978

VISION

To ensure customers growth with Quality, Innovative & Precise Solution 

MISSION

To be the best managed company with Team Members of 1200 & Turnover of 550 crore by 2030 

VALUES

Trust, Honesty & Transparency, Quality Commitment. Excellence, Innovation & On Time Service 

ESTABLISHED IN 1978

Role of management rotates approximately the fulfilment of organizational destinations through proper allotment and optimum utilization of synergy of team members.

MANAGEMENT

Our infrastructure is equipped with a cutting edge technology, which enable to engineer huge production capacity within stipulated frame of time. Our in-house production unit is equipped with all the facilities, which helps us to industry our merchandise and offer at more militant terms.

Maintaining the balance between victuals of core value and handling an exponential growth is the vital task for the direction team.

We believe in real time business needs that is why we give real time solutions. Our solutions are as required by current scenarios of business. Our solutions always work as per the current technologies and innovative ideas.

COOLING
YOUR INDUSTRY
OPTIMISING
YOUR PROCESS

We believe that the mode of success can be achieved through delivering best quality products. Our function is to produce superior quality products for our clients. Therefore, each production stage/process is monitored and Inspected duly by highly experienced quality controllers. Finished products are tested for full functionality, reliability, efficiency and durability.

QUALITY

We believe in Ultimate Quality in all work we do. Our priority is to give pure quality with innovative technology which can be used in any platform of business. Our quality motto is to give 100% satisfaction for products with great after sales account management ongoing services.

Creating better products today requires much more than a product design creature. We would like to provide our products that help our customers to make full use of their powers, make accomplishment higher than expected and trade aspires while being moved and having hope in developing their products. Our quality management system covers all current industry standard methods, including machine and process capability analysis, etc.

At HIMALAYA , our product is identical with pride. Building a machine surpasses the chore task of just fulfilling production objectives and getting through the numerous inspection tests. Every product is power packed to perform in the real world before it actually leaves the virtual sphere.

The search for excellence has become part and parcel of all our employees of manufacturing department and this spirit runs across outside suppliers and after-sale support groups. Our team always has an eye for details besides taking personal pride for their work considered the two most vital attributes of assembly team. All members analyze their own work and are accountable for their performance. This attention to precise fit and functional manufacturing task delivers products of consistent quality and performance continually throughout the year.

ESTABLISHED IN 1978

We have developed an ultra-modern and state of art infrastructure over 5000 sqm area. Our infrastructure is equipped with all the required top notch machines and tools with built up area of 1100 sqm. For an increasing production rate and reliable operation execution, we have divided it into various operational units. Each and every department is handled by a skilled manager. We are able to cater bulk demands of our valued customers just because of our latest production unit as it is manufacturing the offered collection of product in a higher production rate.

INFRASTRUCTURE & MACHINERY

● Laser cutting machine

● CNC Bending machine

● CNC Shearing machine

Application Driven Customer Solutions

Plastics & Rubber

presses, injection moulding, extrusion (sheet & profile), blow moulding, thermoforming, PET

Lasers

(with a specific Laser chiller) cutting, welding, profiling, optics, medical, engraving Food & drinks confectionary, bakeries, distilleries, breweries, wineries, dairies, bottling, carbonation, meat & fish processing, vegetable & salad processing, storage

Chemical & pharmaceutical

jacketed vessels, polyurethane foam mixers, natural gas, industrial cleaning, laboratories, healthcare, solvents, paints

Metal working

processing & transformation of precious metals, aluminium working & processing

Mechanical & Engineering

machine tools, welding machines, rolling mills, presses, extruders, cutting, profiling, polishing, electric spark machinery, hydraulic control unit oil cooling, pneumatic transport, heat treatment

Paper & related applications

printers, cardboard, labels, plastic film Other applications ceramics, textiles, wood, air compressor cooling

Other Applications

PRODUCTS

Panel Air Conditioner

HIMALAYA's panel air conditioner units are excellent match to your electrical and electronic panel cooling needs.

These units are designed specifically understanding the high sensible cooling requirement and able to run non stop for long hours. High reliable components and electronics supported by high ambient design ensure your machines work smoothly all year round.

The model is available with various capacity ranged from 500 W to 8500 W on single chassis. The mounting, power supply & refrigerant options are available.

Range: 500w-8500w

Refrigerated Air Dryer

HIMALAYA is dedicated to production & manufacture on high quality refrigerated air dryers in India, designed to remove moisture and contaminates from compressed air systems. We select only the highest quality components and materials to use in the manufacturing process of our dryers.

Through a process of rationalization and innovation our dryers have evolved into a high quality product backed by the industry's longest warranty.

Range: 500w-8500w

Industrial Dehumidifier

The Dehumidifier is reduced the humidity level in the air, which is generally for health issues. Dehumidifiers induce an excess of water that has been separated from the conditioned air.

Dehumidifiers are also used in industrial climatic chambers, to covered relative humidity within certain rooms to keep at levels conducive to the processing of products.

Himalaya Air Dehumidifiers are specially developed in India to match unique moisture/humidity control necessities during processing, packaging, drying, and storage.

ESTABLISHED IN 1978

PRODUCTS

Water Chiller

HIMALAYA'S water cooled chillers are Designed to work in India. For hostile industrial environment, Himalaya chillers are appreciably reducing costs in a broad range of industries. Our water Chillers for cooling process and cooling equipment increase processes of production and less operating prices.

Oil Chiller

Himalaya Oil Chillers of India are specially designed to cool oil directly through refrigerant-to-oil heat exchanging circuits. The Chillers are developed to control the oil arriving the evaporator at high in temperature than by default temperatures, even the outlet temperature of the oil also being concluded higher than the qualified process cooling Uses. These Chillers work within highly tropicalized weather situations, Covering high fluid temperatures, which makes the plan of these Chillers interlaced & actually extraordinary. Designing and the choice of equipment are critical to conform to particular cooling requirements as well as very high oil pressures.

Range: 500w-8500w

Water Cooler

Our provided coolers are precisely manufactured by using components specific and with the sophisticated help of techniques by our advance. Highly applauded for its qualitative features, these offered coolers are mainly use in office and other similar public places for providing cool water. Moreover, our offered coolers can be availed from us in variegated designs at promised time period. these coolers are complete value for money. Also, even eco-accommodating variants of these coolers are accessible.

Range: 10 ltr – 200 ltr
